PROJECTS:

1. **Restaurant One Solution:**
   - I worked on a database project titled "Restaurant One Solution" (ROS), where I learnt about Data generation, Data anomalies, Pivot table, Data connections, Data cleaning, Bug checking.
   - **Key features-**
   - Restaurant One Solution is a rapidly growing SaaS company, specifically designed and developed to challenge existing technology available to hospitality industry.
   - It is a highly configurable software solution, designed to bridge the gap between Restaurants and ERP solutions.
   - The primary focus is to make your restaurant business succeed.

   - **Technology used:**
   - Microsoft Excel

   - **Key Responsibilities: -**
   - Created low level design for Inventory module.
   - Follow Agile Scrum methodology. Define solution for the backlogs scoped for the Sprint.
   - Worked on Supplier, Purchase Order and Stocks module.
   - Work with Git Source Control – Check in(Push), Checkout(Pull), Fork, Work on feature branches and then integrate with Dev /Master upon approvals from Tech Lead.
   - Implemented Mockito Unit testing, Logging, Caching and manage database.
   - Deployed application into app services using CI/CD pipeline.

2. **Connect My Doc:**
   - A telehealth solution to connect patients and doctors.
   - Patients can book appointments for a particular doctor who will be suggested to them based on the symptoms they are facing and the availability of the doctors on the said date and time.

   - **Technology used:**
   - Bootstrap, HTML, CSS, Typescript, Angular and Tailwind CSS.

   - **Key Responsibilities: -**
   - Worked on the front Screens from the pages for signing up to my profile.
   - Created low level design for Inventory module.
   - Worked on Appointment Service which interacts with patient service, doctor and clinic services .User can book appointments, manage prescriptions, vitals, tests etc.
   - Work with Git Source Control – Check in(Push), Checkout(Pull), Fork, Work on feature branches and then integrate With Dev/Master upon approvals from Tech Lead.
   - Implemented Mockito Unit testing, Logging, Caching and manage database.

3. **Job Check:**
   - I Work on Client Project "Job-Check" As a UI developer to create responsive design which supports all devices.

   - **Technology used:**
   - Bootstrap, HTML, CSS, Typescript, Angular and Tailwind CSS.

   - **Key Responsibilities:**
   - Working on authentication screen.
   - Working on search engines which type of they want
